Ordering Example (model – series – finish): ST8-BK

Product Details

Description: Shallow profile low voltage Linear System track. Uses Linear System SF fixtures and Quick Connect elements.

Materials: Polycarbonate track with 12 gauge solid copper conductors. The track is supplied with end cap and mounting hardware.

System: The complete Linear System is comprised of ST track, an SLE live end, fixtures, and a transformer. The SLE live end, low voltage fixtures and transformer are ordered separately.

Transformer: Linear System ST track is a single circuit track rated at 240 watts if powered by a 12v transformer, and 480 watts if powered by a 24v transformer. Both surface mount and remote transformers are available. Surface mount models are electronic up to 150W, while remote models are available in electronic or magnetic up to 1000W.

Finish: Abrasion resistant paint finish. Available in Black (BK) or White (WT).

Listing: UL & CUL Listed. 5 year W.A.C. Lighting product warranty.

Specification Features

- Track may be suspended from ceilings with the use of the additional SCK ceiling suspension kit and SC4/SC8 track carrier.
- The Linear System can use any element from the W.A.C. family of Quick Connect track heads and pendants. Order one SADP for each element.
- The ST track may be cut in field to any desired length.
- The length of the ST4 plus the SLE live end is 4', length of the ST8 plus the SLE live end is 8'.

Compatible Accessories (sold separately):

<p>Surface Mount Transformer :</p> <p>SST-60E-color SST-150E-color SFC-150E-color</p> <p>120V input, 12V output Capacity from 60w to 150w</p> <p>See individual transformer spec sheet for further details.</p>		<p>Live End Connector:</p> <p>SLE-color</p> <p>Accepts wires from transformers and connects to track. Used when Linear Track is powered by a surface mount or remote transformer.</p>		<p>Quick Connect Adapter :</p> <p>SADP-color</p> <p>Track adapter allows all W.A.C. Quick Connect track heads and pendants to be used on the Linear System.</p>
